

EXIT THE GAME

The Forbidden Castle

For 1-4 players, ages 12 and up

Search for the
"Kosmos Helper
App" in the iOS
App Store or in
Google Play.

CAUTION: Do not look at the playing materials (cards, book, etc.) yet!
First, read this manual together out loud and carefully follow all of its instructions.

What's the game about?

It's finally vacation time again! This year, it's a trip to an idyllic village in the mountains. To avoid another breakdown*, this time you're taking the train! Three hours behind schedule, you arrive at your vacation rental, where you find brochures with ideas for outings — including an impressive castle. The flyer looks a little amateurish and homemade, but you're really into medieval buildings!

The next day, you set out and hike to the castle. No ticket booth, nobody else around. So much the better, you can explore undisturbed! Soon, you have entered the castle and find yourselves in a magnificent throne room. All of a sudden, the great wooden door slams shut and you realize (yet again) that this might not have been such a good idea ...

The castle is filled with riddles. **You will only be able to escape if you manage to solve all of the riddles in time.** Otherwise, your creepy host will never let you leave.

IMPORTANT: Do not look closely at any of the **game materials** before starting the game! Do **not** leaf through the book yet, and do **not** look at the fronts of the cards yet. Wait until “the game” tells you to.

Game materials

- 88 Cards
 - 24 Riddle Cards
 - 31 Answer Cards
 - 33 Help Cards
- 4 Strange items
- 1 Book
- 1 Decoder disk

In addition, you will need **something to write with** (ideally **ball-point pens, pencils, and an eraser**), one or more **sheets of paper** and a **watch** (ideally a **stopwatch**), to keep track of the time. A pair of **scissors** will make the game easier to play. If you don't have any available, you can still play and just rip the materials with your hands.

Game setup

Get the **book** and **decoder disk** ready on the table. Leave the “**strange items**” in the box for now. Sort the **cards** into three piles in accordance with what is written on their back sides:

- > Riddle Cards
- > Answer Cards
- > Help Cards

Be sure not to look at the front sides of any of the cards.

Check to be sure that the Riddle Cards and Answer Cards are arranged in ascending order according to their letters or numbers. Sort the Help Cards according to their symbols, and then place them on the side of the table. Place cards with the same symbol, one on top of another, such that the “1st CLUE” card is on top of the “2nd CLUE” card and the latter is on top of the “SOLUTION” card. Exception: For the  symbol, there is just 1 Help Card.

Where is the game board?

This game has no game board! You will have to figure out for yourselves what you have to find in the game and what the rooms look like. At the beginning of the game, you will have **only the book and the decoder disk available to you.**

As the game continues, you will add the **Riddle Cards** — either to be found in illustrations, or referred to in the text. Whenever this happens, you can pick the corresponding cards from the Riddle Card pile and look at them.

Likewise, you can only use the **“strange items”** in the box when explicitly told that you have found them. Until then, leave them untouched in the box!

Example:

*If you find an illustration like this, you may **immediately** pull the corresponding Riddle Card out of the pile and look at it.*

Course of play

Your goal is to escape together from the forbidden castle as quickly as you can.

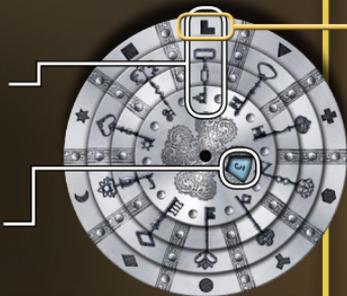

That would definitely be easier if not for the fact that every lock in the room is secured with a riddle. As soon as the game starts, you may look at **all the pages** of the book. During the course of the game, you will keep finding objects that are locked with a **three-part key code**. To open them, you will have to figure out the matching code and enter it into the **decoder disk**. At the edge of the disk, you will see **10 different symbols**. Each symbol stands for a code to be cracked. But you will have to figure out for yourselves which symbol belongs to which code. You will want to be sure to pay attention to every detail. If you think you can crack a code, enter it under the corresponding symbol on the disk. Then, look through the **viewing window** on the smallest wheel to see a number.

This number indicates the **number of the Answer Card** that you are then allowed to look at. If the code is incorrect, you will have to keep searching for a solution or switch to another riddle for the time being. If the code is correct, the Answer Card will tell you how to continue.

Example:

For the riddle with the  symbol, you came up with  as the key. You enter this combination under the  symbol on the decoder disk.

In the little window, you will see the **number of the Answer Card** that you are then allowed to pull out of the pile and look at.

➔ **Is the code incorrect?**

If so, the Answer Card will tell you. In that case, simply return the card to the pile and take another look at the riddle that you failed to solve. Maybe there's something that you overlooked. Or it may be that you simply don't yet have the hints that you need to solve it. Then you will just have to continue somewhere else.

➔ **Is the code possibly correct?**

If so, the Answer Card will look like this:

➔ **Where will you see the code symbol?**

Good question! To answer it, you will have to take a close look at the pictures in the book or on the Riddle Cards. **All possible locked objects** can be found in those places.

All of these objects are **marked with a symbol**.

Our example involves the table with the

 **symbol** on it.

To continue with this example scenario: Next, you will take a look at the Answer Card next to the table and see that you should now retrieve Answer Card 15 from the pile.

NOTE: You have to see the **object with the symbol** on a **Riddle Card** or **in the book** in order to be able to open it. You cannot open something that you have not found — just like in an actual room.

➔ Is the code *really* correct?

If so, the Answer Card will tell you how to continue. You will find one or more new Riddle Cards which you will be allowed to **pull from the pile and look at immediately**.

➔ Is the code *actually* incorrect?

Well, in that case you must have made a mistake. You will just have to think about it some more and come up with a different code.

IMPORTANT:

- ➔ Whether wrong or right — return all Answer Cards to the Answer Card pile.
- ➔ All codes can be solved logically. You shouldn't just try all possible combinations on the disk.

Need some help?

Of course, the game can provide you assistance if you get stuck. For each code, there are three Help Cards that can be recognized by the symbol on their back sides.

In addition to giving you an initial useful clue, each “**1st CLUE**” Help Card also tells you which Riddle Cards you must have found in order to be able to solve the corresponding riddle.

The “**2nd CLUE**” Help Cards will give you somewhat more concrete assistance in finding a solution to the corresponding riddle.

The “**SOLUTION**” Help Cards provide the solution to the riddle.

IMPORTANT: Always take the Help Cards for a specific Riddle Card or riddle in the book. These riddles are usually identified with a symbol (matching a symbol on the decoder disk). It won't help you to use Help Cards if you have not found a riddle with the corresponding symbol.

So have a little patience — some of the riddles can only be solved with the help of several Riddle Cards. **You won't always have all of them available to you right away. Sometimes, you will first have to grapple with other riddles to get more cards.** But don't be shy about using Help Cards if you get stuck.

Once you have used a Help Card, place it on a discard pile.

Additional playing materials

In addition to the materials contained in the box, you will need **a pencil and paper** for taking notes.

You will also need a **watch/stopwatch**.

IMPORTANT: You can **write on, fold, or tear the materials ...**

All of this is allowed, and sometimes even required. You can only play the game once — after which you will know all the riddles, and won't need the game materials any longer! If you like, you can also use **scissors**, to cut the materials rather than tearing them.

When does the game end?

The game ends when you have solved the last riddle and escaped from the forbidden castle. A card will tell you that. Start a stopwatch (or check the time) at the beginning of the game so you know how long you needed.

You can look at the table on the next page to see how well you did.

When calculating the number of Help Cards used, only the ones that gave you new hints or solutions should be counted. If a Help Card

only had something that you knew anyway, do not include it in the calculation.

|  | No Help Cards | 1-2 Help Cards | 3-5 Help Cards | 6-10 Help Cards | > 10 Help Cards |
|---|---------------|----------------|----------------|-----------------|-----------------|
| < 60 Min. | 10 stars | 8 stars | 7 stars | 5 stars | 4 stars |
| < 90 Min. | 9 stars | 7 stars | 6 stars | 4 stars | 3 stars |
| < 120 Min. | 8 stars | 6 stars | 5 stars | 3 stars | 2 stars |
| > 120 Min. | 7 stars | 5 stars | 4 stars | 2 stars | 1 star |

One final tip

Any game materials that you successfully used to help solve a riddle should be set aside, but not put away. You might need some materials again. But his way, you will be able to keep track of the materials more easily and won't get them mixed up. For **some of the riddles**, the only things that you will need are the **illustrations of the rooms**.

The game begins

What are you waiting for? **Start the stopwatch** and get out of the forbidden castle before it's too late! **Now** you are allowed to look at the **entire book** and begin solving riddles. If anything is unclear, don't be shy about **looking something up in the manual during the game**.

Inka & Markus Brand and Kosmos thank all the test players and rule readers.

The Authors:

Inka & Markus Brand live with their children Lukas and Emely in Gummersbach, Germany. They have published many children's and family games together and won numerous prizes. Of course, they are avid riddle and escape game fans.
